

Cortex: Unified Planning System

Overview

Unified Planning, Faster Decisions on One Platform

Cortex is the planning workspace that enhances retail planning processes and current strategies by removing silos and simplifying workflows.

It brings Category, Format, and Planning managers together on one connected platform, reducing dependence on spreadsheets and improving visibility across teams.

With AI-supported insights, automated assortment logic, and real time alerts, Cortex simplifies how information flows, helping teams move from multiple files to a single, dynamic view.

By connecting data across assortment and forecasting, Cortex enables faster, more consistent, and collaborative decisions using the same business rules and expertise that already guide planning today.

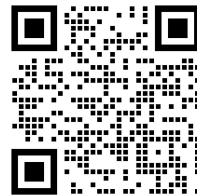

In phase one, the live beta focuses on creating a single source of truth and turning routine analysis into actionable insights, supporting smarter execution while keeping strategy firmly in our teams' hands.

Project Granary - Business Areas and Systems

Mapping of Business defined key processes and core areas to System areas and systems that are going live

Key Process	Business Core Area	Systems Area	Phase 1 Delivery
Flow of goods through our business	A. Space Planning B. Ranging C. Planograms D. Forecasting and Replenishment E. Vehicle Planning F. Warehouse Management	A. Sell - Space Planning B. Plan & Buy - Store Assortment Planning C. Sell - Store Planogramming & Visual Merchandising D. Plan & Buy - Sales and Inventory Forecasting, Replenishment E. Move - Transport Optimization F. Move - Warehouse Operations	A. Ranging B. Forecasting
Supporting our category and Format teams	A. Trade planning B. Pricing C. Margin management D. Markdown E. Loyalty	A. Plan & Buy - Vendor/Brands and Category Management B. Sell - Price & Promotions Management C. Plan & Buy - Margin management D. Sell - Price & Promotions Management E. Sell - Personalized Targeting, Coupon & Loyalty	-
New Store Development	A. Site Research GIS B. Store planning	A. Sell - Store Network Planning B. Sell - Store Planogramming & Visual Merchandising	
Store Operations	A. BOC, Store Ops B. Complaints	A. Sell - Store Ops & Monitoring B. Sell - Customer Feedback, Analytics & Action

The Need for an Integrated Planning Workspace

Modern retail needs a unified, intelligent ecosystem. Cortex is built to connect category, format, and planning teams for faster, data-backed decisions.

A. Fragmented Decision-Making

Disconnected tools (Excel, emails, trackers) slow execution and dilute accountability.

Cross-functional collaboration gaps between category, format, and planning teams.

B. Visibility Gaps Across Teams

Inconsistent access to live sales, inventory, and forecast data across functions.

Limited visibility into store-level performance and assortment alignment.

C. Manual, Non-Auditable Workflows

Offline approvals and untracked decisions hinder governance and speed.

Absence of a digital audit trail limits transparency and traceability.

D. Inefficient Ranging & Forecasting Loops

Category and forecasting cycles operate in silos, delaying response to demand shifts.

No unified framework for baseline and consensus forecasting.

E. Limited Intelligence in Planning

Insights remain static and reactive instead of AI-driven and prescriptive.

Lack of automated exception alerts or root-cause recommendations.

F. Disconnected Performance Measurement

KPIs tracked in isolation without a single version of truth across teams.

Lagging performance visibility prevents timely corrective actions.

Buy & Source: Unified Planning

Scope for Phase 1

Categories, SBUs, and segments identified for Phase 1 implementation, mapped to respective system modules and segment codes

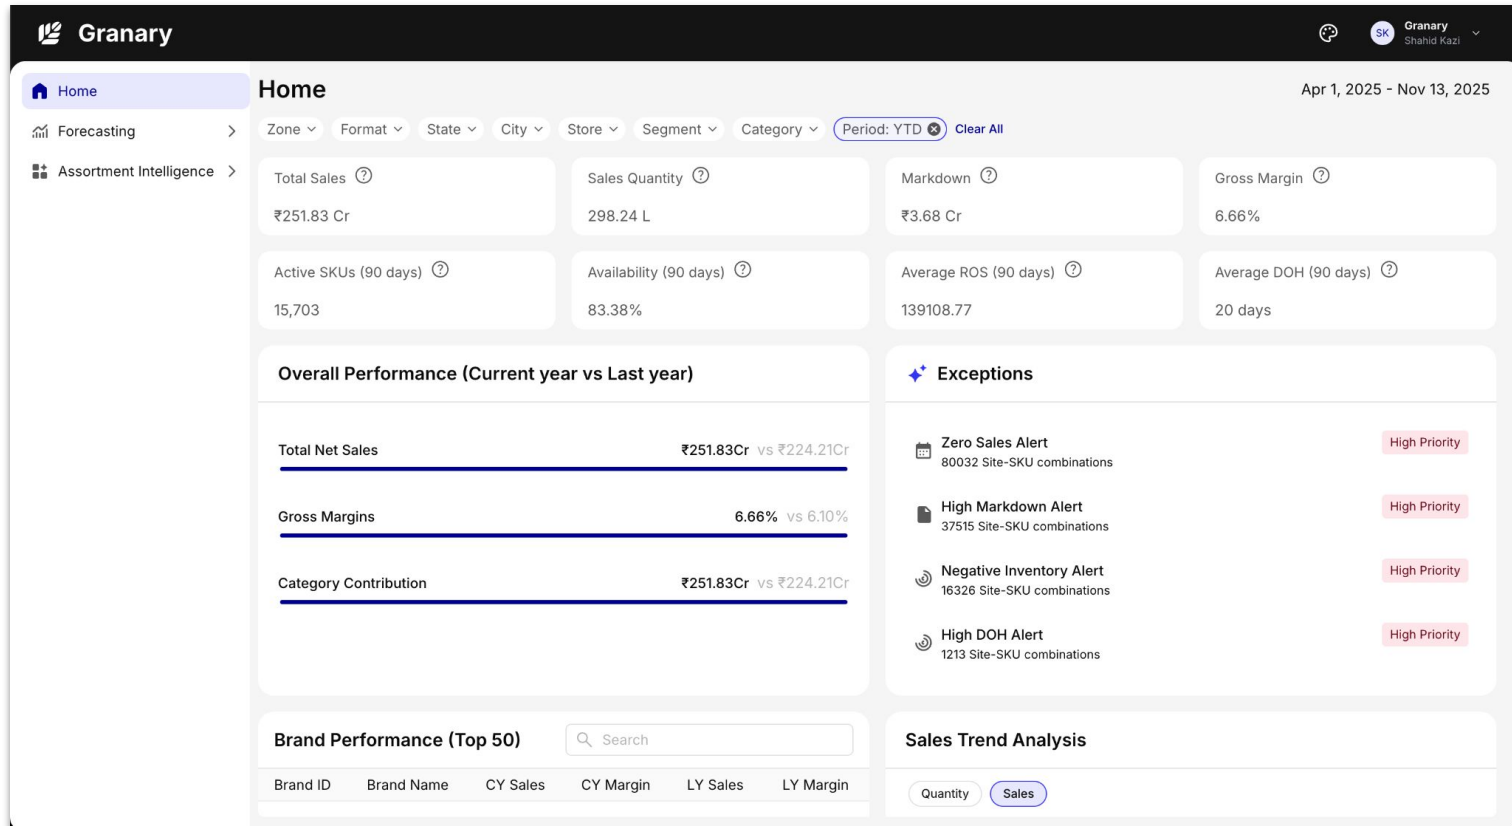

MH SBU	MH SBU Code	MH Segment	MH Segment Code
Food	900	BEVERAGES	12
Food	900	DAIRY	14
Food	900	CONFECTIONARY & SNACKS	16
Food	900	PROCESSED FOOD	17
Food	900	STAPLES	18
Food	900	FROZEN VEG. / SNACKS	49
HOME AND PERSONAL CARE	901	HOME CARE	19
HOME AND PERSONAL CARE	901	PERSONAL CARE	20
HOME AND PERSONAL CARE	901	BABY CARE	26
HOME AND PERSONAL CARE	901	GM FMCG	B1

Scope for Phase 1

Stores identified for Phase 1 implementation, mapped to respective system modules and location hierarchies

Store Code	Store Name	Updated Area	Store Classification
6217	SMT MUM Mum Acme Mall	41,835	A+A+
6220	SMT MUM Mum Phoenix Market Cit	57,743	A+B
6221	SMT MUM Mum D Victoria Mall	9,458	CA+
TM95	SMT MUM Navi Mum SaiKrupaHillV	8,595	CA+
FR06	SBZ MUM Mum VILE PARLE-MONGIBA	17,203	BA+
FR00	SBZ MUM Thane Lodha Experia Do	30,243	A+A
FR14	SBZ MUM THANE-KALYAN-NETIVALI	39,581	A+B
5518	SMT MUM Navi Mum RCP	16,604	BA+
TAJF	SMT MUM Thane Badlapur West	15,607	BA
T0II	Smart T W Gardens Wadhwa Kandi	30,524	A+A+

Planning Module: Phase 1 Release

Cortex

Cortex: Execution Phases

Phase 1: Specification

Key activities

- Project kick-off
 - Key stakeholders from each business stream are expected to join (F&R, Assortment, Space, Promo)
- Business specification workshops
 - Define business requirements and build the Cortex solution capabilities and best practices
- Technical specification workshops
 - Define data requirements needed for the project in Cortex standard interface format
 - Validate data and integrations
- Environment setup
 - Cortex applications are created and configured
 - SSO authentication to Cortex applications, with IP whitelisting.

Deliverables

- Interface specification document finalized.

Phase 2: Technical Implementation

Key activities

- Integration and Data Validation Planning
 - Make integration and data validation plan
- Interface Development and Testing
 - Build data interfaces
 - Conduct integration testing
- Data Upload and Validation
 - Upload data into Cortex, including historical datasets
 - Deliver data validation training
 - Execute data validation, enabling user access to the solution
- Testing and Solution Finalization
 - Perform Operational Acceptance Testing
 - Conduct detailed design and solutioning sessions

Deliverables

- Potential amendments to interface document
- Data validation completed and signed off
- Integration testing completed and signed off

Phase 3: Business Configuration

Key activities

- System and Process Configuration
 - Configure the Cortex system and business processes based on defined use processes and business rules
- Review and Alignment Sessions
 - Conduct weekly playback sessions with the Grocery team on the configured solution
 - Organize additional business configuration workshops to clarify configuration details (if required)
- Performance and Access Setup
 - Measure baseline KPIs
 - Define user roles within Cortex

Deliverables

- Business processes and rules configured in Cortex
- Baseline KPI measurements completed

Phase 4: Trainings & UAT

Key activities

- Planning and Preparation
 - Develop the go-live plan.
 - Agree on the limited scope for go-live (F&R) and deployment approach.
- Training and Enablement
 - Conduct Super User training sessions on use processes and system logic (train-the-trainer model).
 - Deliver end-user training sessions (performed by Reliance's Super Users).
- User Acceptance Testing (UAT)
 - Perform UAT on use processes and calculation results.
 - Fine-tune system configuration based on UAT results.
- Documentation Updates
 - Update technical documentation based on fine tuning

Deliverables

- Train-the-trainer materials
- Updated technical documentation (if required)
- UAT completed and signed off
- Roll-out plan and scope agreed

Phase 5: Early Use Support

Key activities

- Go-Live and Roll-Out
 - Execute go-live and roll-out of the selected (limited) scope.
 - Finalize the roll-out plan.
- Stabilization and Optimization
 - Conduct iterative fine-tuning of configurations based on user feedback.
 - Hold KPI measurement review meetings to assess performance.
- Closure and Handover
 - Finalize project documentation.
 - Prepare for project closure and handover to the Continuous Services Team.

Deliverables

- Finalize relevant documentation
- Handover to Continuous Service mode

Early Business Support

Key activities

- Super Users to provide feedback on User experience and journeys to finetune the platform
- Super Users to validate and raise discrepancies on data accuracy and guide platform team to interpret/correct the same
- Business to lead the effort with RRA for any data inaccuracies in the databricks layer (data source of truth)
- Business teams to help with any meta data maintained outside RRA if its needed to arrive at any analysis in the platform
- Superusers to help evangelize the platform and assist in bringing their teams up to speed
- Platform team will provide all supporting logics used for various analysis

Data key assumptions

- Data interfaces and data model are set up according to Cortex standard format.
- Historical data, including sales and promotions, is of adequate quality
- All data will be available and validated along with the Grocery team during the limited roll out phase
- Business configuration will commence only after completed data validation. It is expected that business team will perform data validation independently.
- Accurate balance and open order data is available.
- Production data will be used for solution development

Data Quality and Consistency Assessment

Summary of Key Findings from the Latest Numeric Sanity Analysis

This report summarizes the major data quality and consistency issues identified in the recent validation run. Each section indicates the issue type, its impact, and the potential business impact.

Critical Issues	Issue of Data	Concern Level	Likely Root Cause
Gross Mismatch	1.50%	Medium	Master-line reconciliation error
Discount + Gross	1.52%	Medium	Over-discounting or mis-priced offers
Gross - Discount = 0	1.52%	Medium	Double or duplicated discounts
Negative Sales	1.52%	Low-Medium	Issues in returned transactions
Net - Gross	1.45%	Medium	Not an accurate sign-off
Negative Tax	1.41%	Low-Medium	Returns or pending inventory
Margin and Adjusted Margin Issues	<0.0%	Medium	Sign or scaling inconsistency
Reversing Quantity, Tax, and Unit Issues	<0.1%	Low	Rounding or minor data errors
