

AI Agents for Autonomous Testing  
and Software delivery

# Introduction

Ratl.ai orchestrates AI agents for software testing and product reliability - **autonomously generating, executing, and analyzing tests across APIs, web, mobile, load & performance.**

With seamless CI/CD integration and enterprise-grade flexibility, it accelerates software delivery. Designed for modern engineering teams, **ratl.ai ensures faster releases, fewer bugs, and real-time insights into product health.**

AI Agents for Testing

First-Pass Validation on every build

Simulate real-world traffic using natural language and visual inputs

Automate browser tasks - see, click, assert - without writing a single script

Agentic TestPlay Tightly integrated into engineering and GTM

On-Prem & Cloud Ready

# How Ratl.ai powers ECommerce Platform testing at scale

## Jio Commerce Platform (1.9.5X & 1.10.2X)

| API       |            | UI (Webshots) |            |
|-----------|------------|---------------|------------|
| 322       | 1590       | 10            | 120        |
| Scenarios | Test cases | Scenarios     | Test cases |

## Swadesh

| API       |            | UI (Webshots) |            |
|-----------|------------|---------------|------------|
| 30        | 160        | 7             | 70         |
| Scenarios | Test cases | Scenarios     | Test cases |

## Netmeds

| API       |            | UI (Webshots) |            |
|-----------|------------|---------------|------------|
| 88        | 470        | 22            | 300        |
| Scenarios | Test cases | Scenarios     | Test cases |

## Tira

| API       |            | UI (Webshots) |            |
|-----------|------------|---------------|------------|
| 280       | 2700       | 19            | 228        |
| Scenarios | Test cases | Scenarios     | Test cases |

## JioGames

| API       |            | UI (Webshots) |            |
|-----------|------------|---------------|------------|
| 30        | 70         | 11            | 165        |
| Scenarios | Test cases | Scenarios     | Test cases |

## Metro Grocery and Pharma

| API       |           | UI (Webshots) |            |
|-----------|-----------|---------------|------------|
| 200       | 1900      | 14            | 196        |
| Scenarios | Testcases | Scenarios     | Test cases |

# Why Ratl.ai

AI-native platform for automated, intelligent testing

Zero-code experience with support for Web UI automation for daily sanity/regression testing with multiple browsers & responsive design support

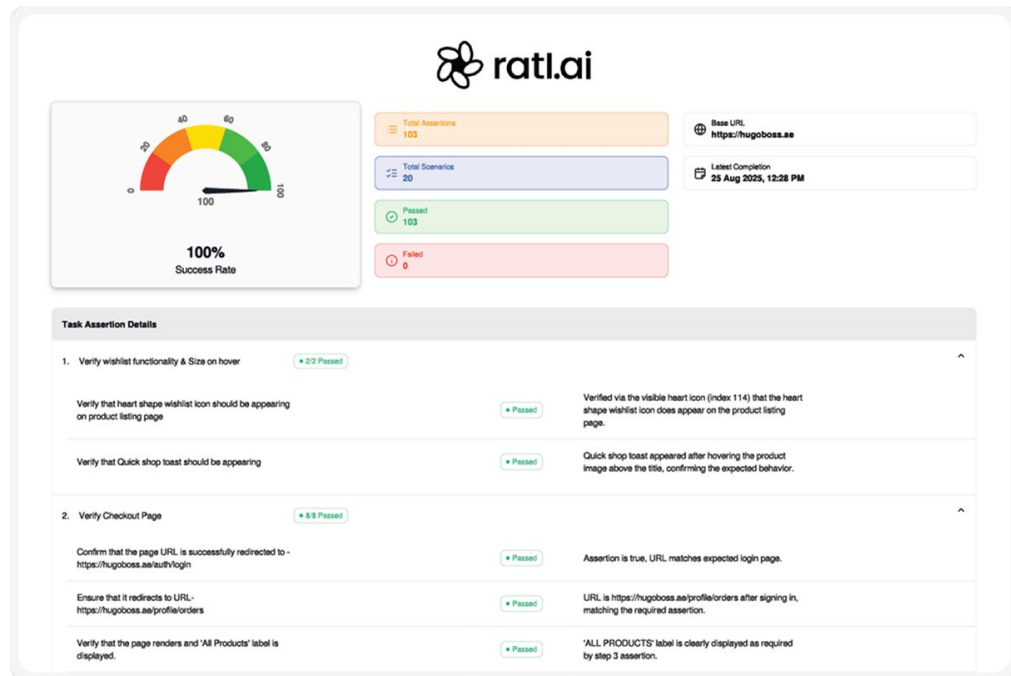

Zero-code compliance testing of multiples PDPs, UI performance lighthouse report of E2E flows [LINK](#)

100+ daily P0 E2E Web UI automation test case are running with PDF report & slack support integrated [LINK](#)

Detailed metrics, logs, and PDF reports available on every test CI/CD run with slack integration

Key Workstreams

# Why it matters

# Why Ratl.ai matters

Reduced  
manual QA time

Gives instant  
feedback & test coverage

Accelerates  
development cycles

Enables  
autonomous validation

# A look at our most successful customers

Latest Customer

Demo Walkthrough

# Live Showcase

# Web Automation – WebShots

Fast. Fluent. Code-Free.

## Create tests with natural language

Describe UI flows in plain English — no code or selectors needed

## Live, human-like execution

Watch the agent perform real mouse, keyboard, and scroll actions — fully traceable with screenshots and logs

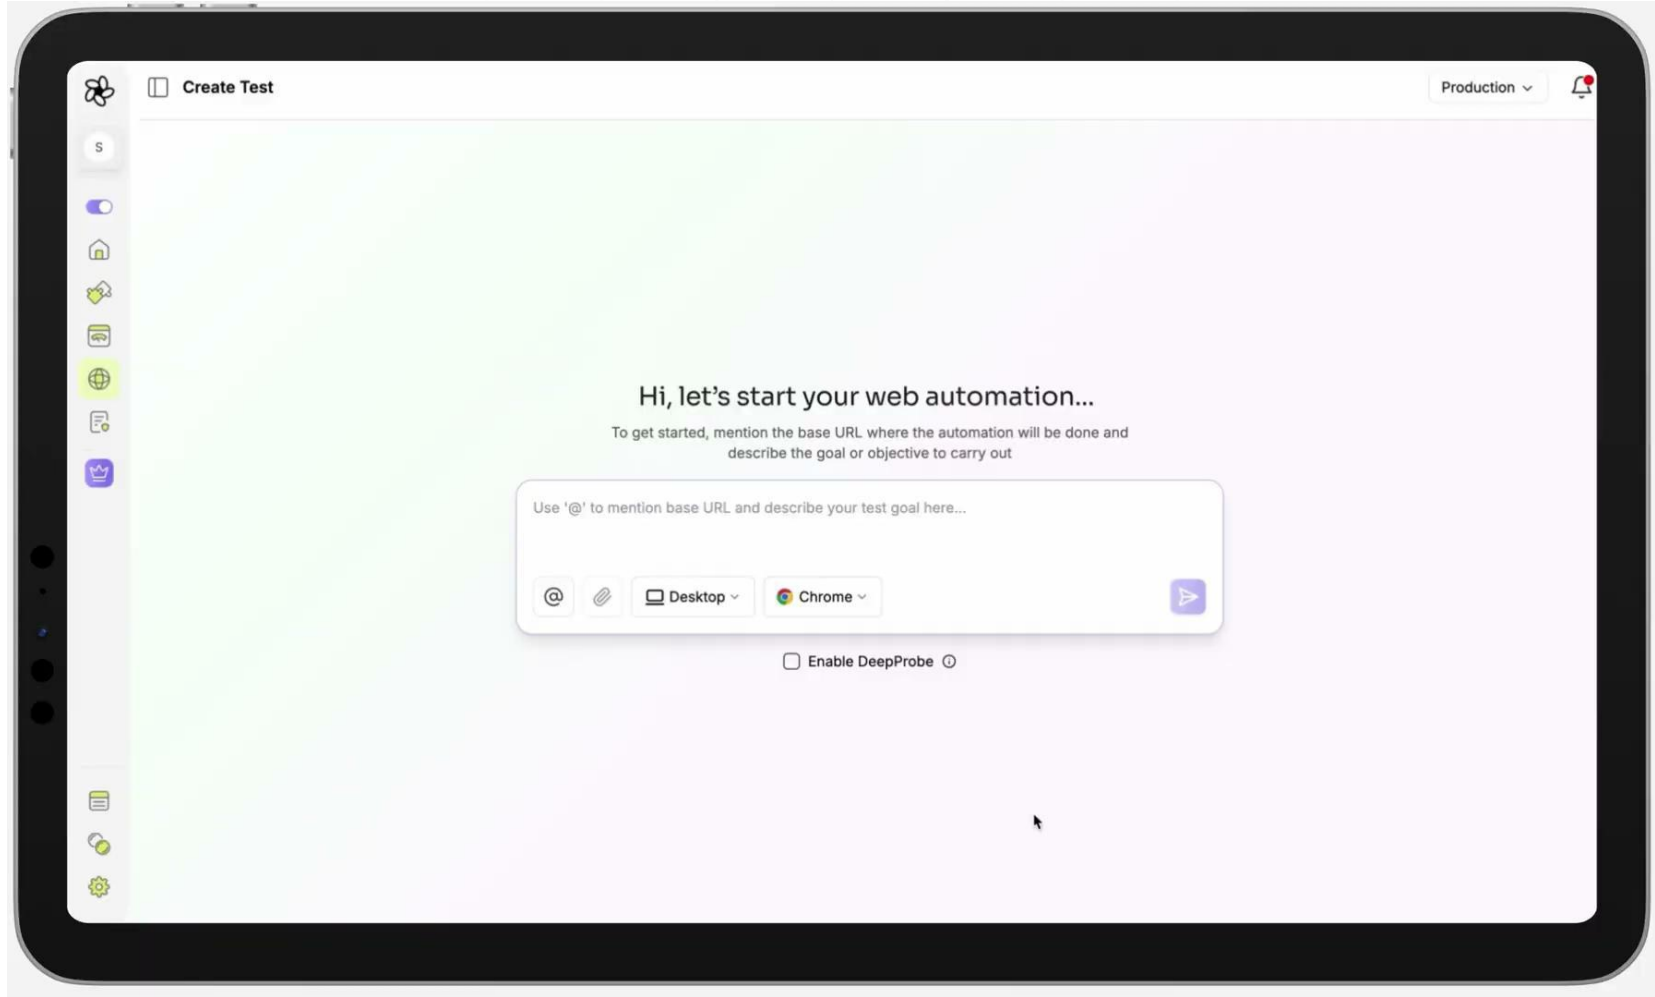

## Structured assertion reports

Get clear pass/fail results with step-by-step traceability

## Built-in accessibility & performance checks

Every test auto-runs DeepProbe to flag WCAG violations and performance issues

# API Testing

Effortless. Accurate. DevOps-Ready.

## Interactive flow editing

Customize API sequences visually — no scripts, just drag-and-drop

## Generates tests automatically

Covers valid, invalid & edge-case scenarios using parsed specs

## Environment-aware test data

Smartly adapts test data for dev, staging, or production

## Instant coverage insights

See what's tested, what's missed—close gaps confidently

## Auto-detects spec changes

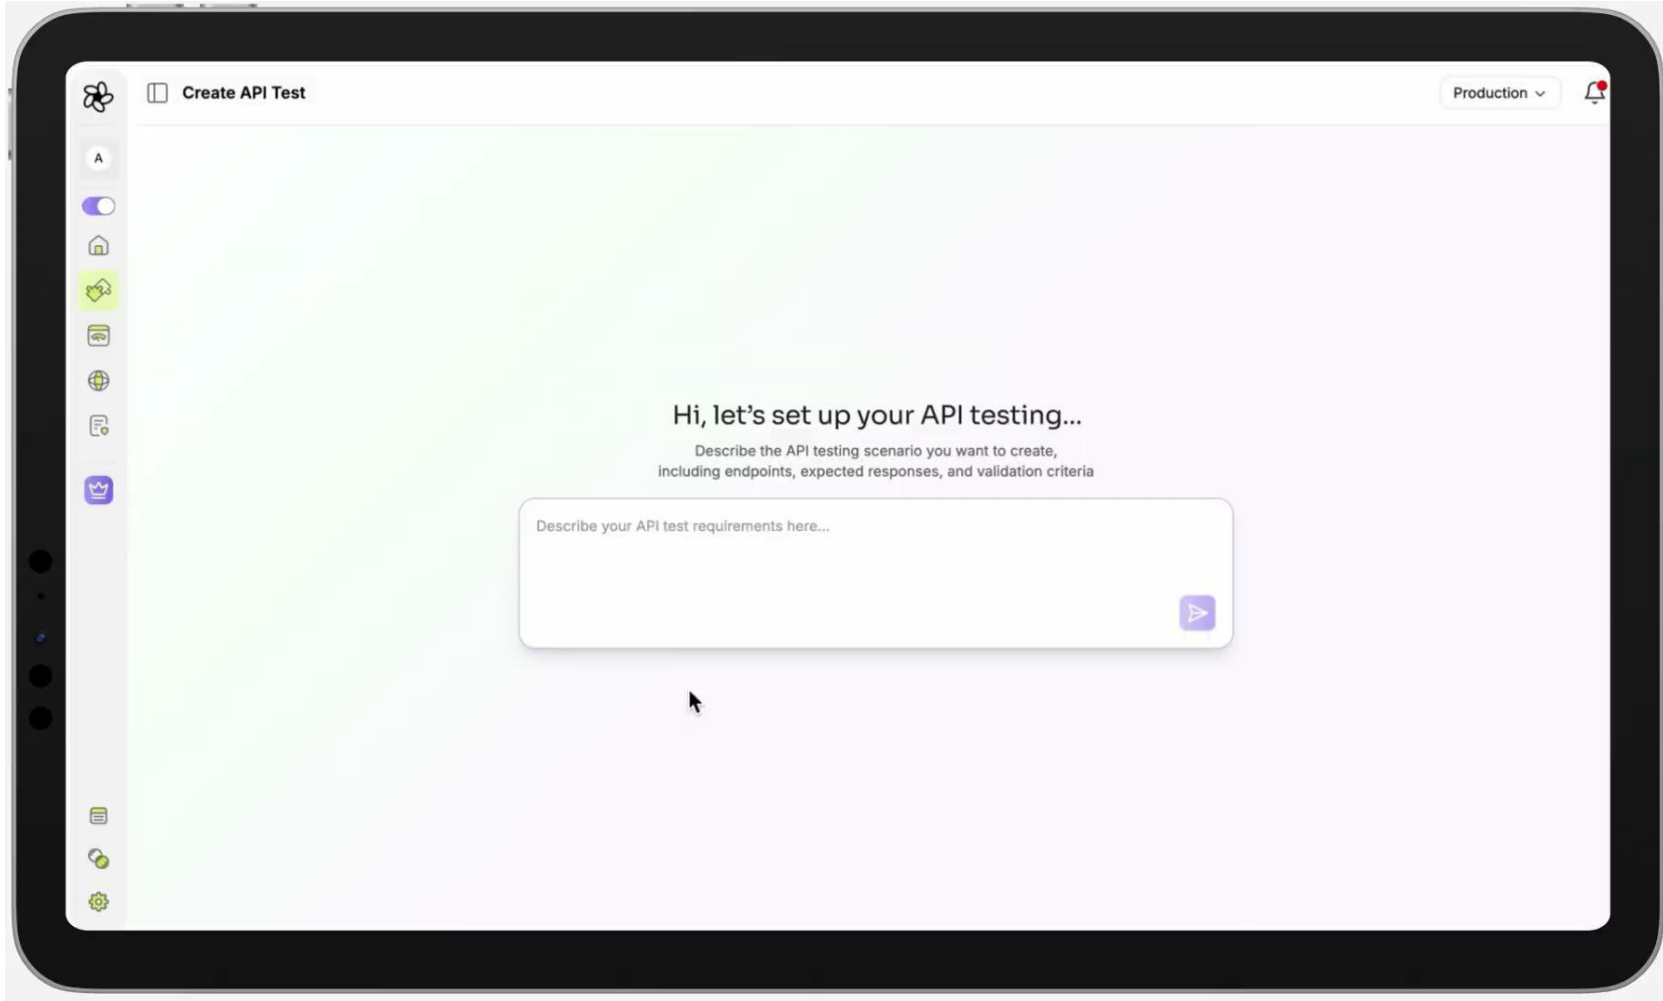

Tracks updates in OpenAPI and auto-updates related tests

## Live results and integrations

Track outcomes in real time and connect seamlessly with your stack

# Load & Performance

Fast. Flexible. AI-Powered.

## Prompt-based testing

Just type: "Run 6000 users for 10 minutes." No scripts, no configs

## Visual traffic modeling

Upload GA graphs or images — Ratl builds traffic models for you

## Traffic replay from ClickHouse

Smartly adapts test data for dev, staging, or production

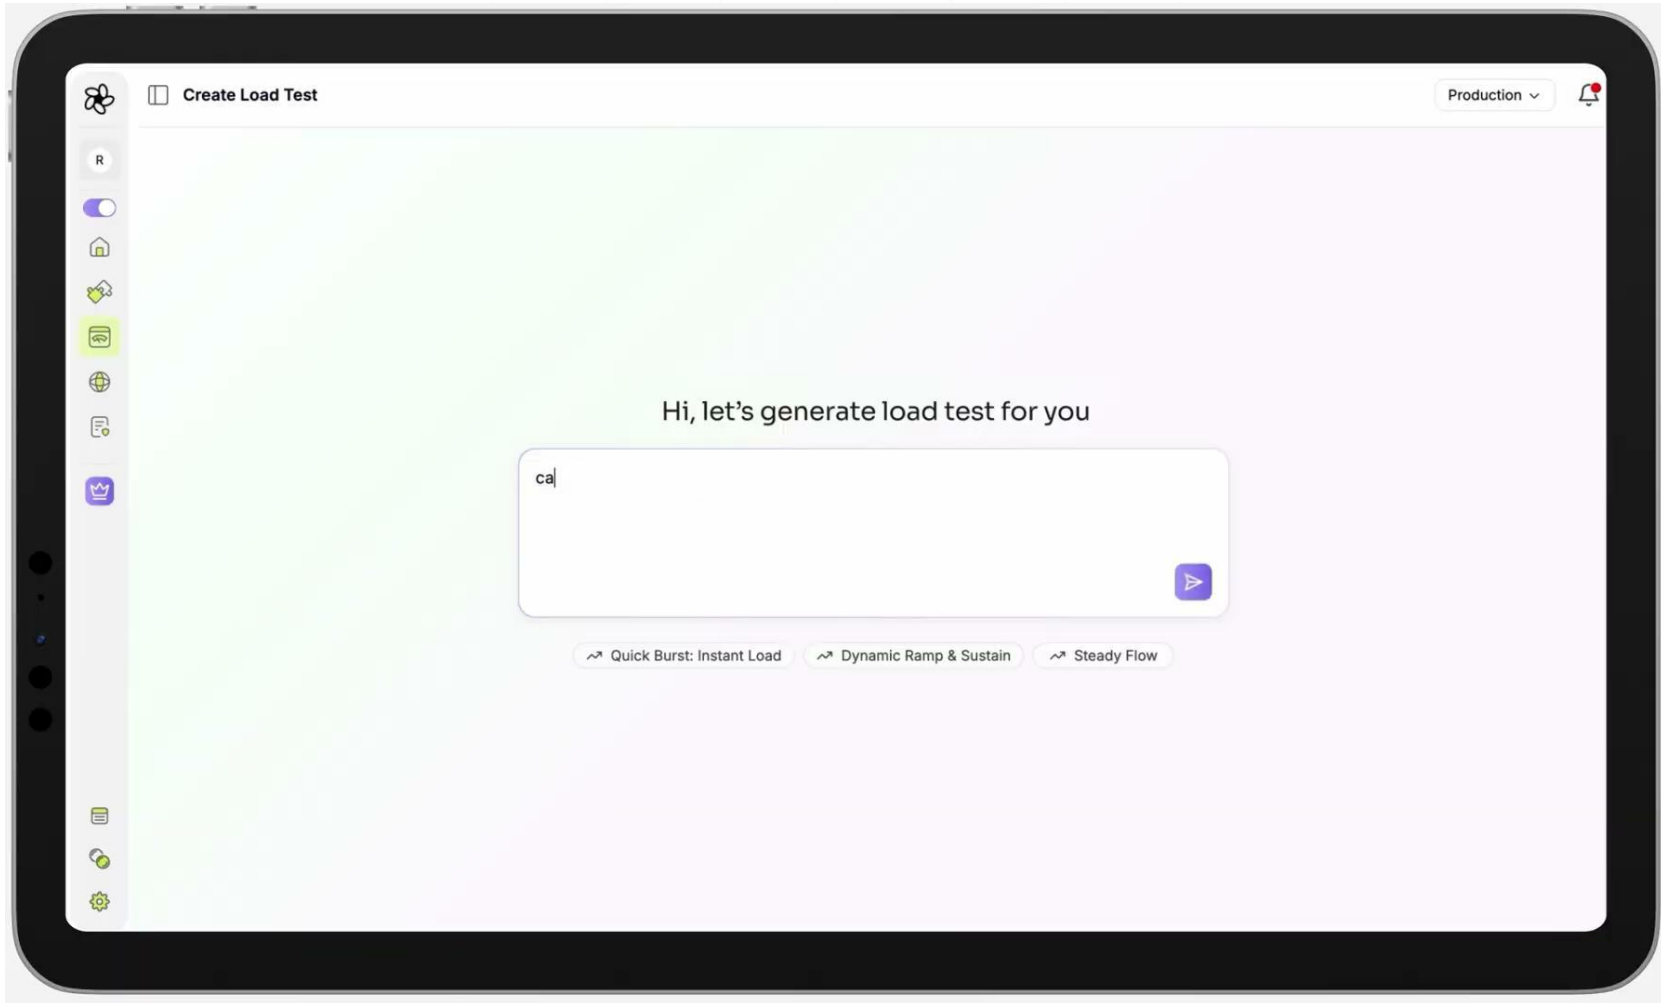

## Zero injection complexity

You define the goal — we handle the ramp-ups, holds & ramp-downs

## Git repo integration

Run load test scripts straight from your codebase

# Compliance & Accessibility

Automated. Scalable. Crystal Clear.

## Smart URL analysis

Upload CSVs to scan URLs in parallel.  
Auto-detect key product pages for targeted compliance checks

## Category-specific rule engine

Run domain-specific checks (e.g., Apparel, Electronics, Groceries) using customizable rule sets

## Visual & text validation

AI checks product images, descriptions, logos, and size charts for legal and visual compliance

## Accessibility audits

Instantly validate pages against WCAG 2.0/2.1 A & AA standards — no setup needed

## Rich, shareable reports

Download PDF/HTML reports with detailed violations, suggestions, and visual highlights

AI-powered platform to  
revolutionize testing and reliability
