

RCPL DIGITAL PLATFORM

Monthly Status Report & Path Forward

| Executive Summary

RCPL has scaled to ₹20,000 Cr in run-rate revenue in under three years — one of the fastest FMCG ramp-ups in the Indian market. Fynd now owns the end-to-end digital platform powering this business.

Our mandate is to deliver a fully functional, enterprise-grade DMS that covers every flow across RCPL's route-to-market — from distributor onboarding and primary ordering, to field sales, asset tracking, fulfilment, and pricing. We are executing this on two parallel tracks:

Track 1 — Stabilise & scale the current platform. We have taken full ownership of the existing stack (in production for ~2 years) and are shipping production deployments every cycle to close gaps, harden data quality, and unlock the next wave of business coverage. Five delivery PODs now run in parallel across Beverage and Non-Beverage segments — covering Pre-Sales, Van Sales, CTS (asset tracking), Primary DMS, and Pricing & Promotions.

Track 2 (Yet to start) — Build RCPL's independent platform. In parallel, we are architecting a dedicated, RCPL-owned platform — purpose-built for FMCG scale and designed to be the long-term home for the business. This removes shared-infrastructure constraints and positions RCPL for multi-segment, multi-geography growth.

₹20,000 Cr FY26 Run-rate	5 PODs Active Delivery Tracks	₹5,000 Cr+ Order Coverage (UAT)	1.86L Assets Under Tracking

What This Update covers

DELIVERED	IN FLIGHT	PHASE 2 ROADMAP
40 items shipped Mar–Apr production deployments across 5 workflow areas. 1 critical security fix closed.	15 items in current cycle Deploying 28 Apr across Asset Mgmt, CTS, Primary DMS, Pre-Sales, SFA. 3 new SFA capabilities.	4 Domains in roadmap Van Sales timeline, Non-Bev SFA initiation, Anchor Order scope, UAT bandwidth.

| Roadmap Coverage - Next 60 days

The FY 2026-27 plan is structured across five delivery PODs, each focused on specific channels and business units. The roadmap targets significant scale expansion, segment broadening, and productivity improvements for field teams and distributors.

POD	Initiative	Business Impact	Business Unit
POD 1	Pre Sales	80% distributors; ~₹4,000 Cr order volume	Beverage
	Van Sales	20% distributors; ~₹1,000 Cr order volume	Beverage
	User Access Management (Multi-Role)	20% Beverage DBs need multi-role	Beverage
POD 2	CTS – Cooler Tracking System	Minimize asset losses ~₹50 Cr via tracking & stakeholder visibility	Beverage
POD 3	Multi-Segment Distributor Mapping	60-70% of L1 issue tickets resolved	All Non-Beverage
	Empowering CSOs	CSO productivity uplift	Staples
	Managerial App	CSO productivity	All
	Beat Management	CSO productivity & compliance	All
POD 4	Auto DO Enhancements	Support ₹500 Cr/month orders; FTE optimization ~₹1 Cr	Beverage
	Primary DMS for Other Segments	Support ₹1,000 Cr/month orders	All Non-Beverage
	User Access Management (Multi-User)	Access to 1,000+ distributors	All
	Anchor Order Fulfilment	20-30% DBs across the business are anchors	All
POD 5	Operational Fixes & Tasks	FTE optimization, productivity increase	Digital/Business Ops
	Pricing & Promotions	Support ₹1,200 Cr/month primary pricing; secondary scheme revenue uplift	All

| Deployment Update

Summary of what has been shipped to production and what is going live in the current cycle

40+ Items deployed to production	5 Workflow areas covered	1 Critical security fix	3 Reporting & document gaps closed
--	------------------------------------	-----------------------------------	--

Area	Key Changes Shipped	Count
Asset Management Workflow & UX	Status change flows, rejection reason visibility for field roles (CSO/ASE/ASM), non-compliant reason in exports, FOS request visibility, asset type addition, deallocation UI fixes.	11 items
Reporting & Document Fixes	Agreements, Installation Complete, and Uploaded Agreements — Excel exports and summary pages now download with full records and counts. BPO dashboard count fixed.	6 items
Security & Data Integrity	Critical: hard-coded OTP vulnerability in Asset Management closed. Duplicate asset validation and blank SAP code restriction fixed. Data deletion tracker deployed.	4 items
Configuration & Platform Admin	Retailer mobile update by CSO, Merchant ID enforcement, GRN template, invoice format, settlement UX, SAP code and matcode corrections, April data corrections.	10 items
CTS — Asset Management Fixes	Return request flow fix, dummy retailer restriction, asset reassignment error resolved, asset sheet download fix (SP & CDE roles), backend verification — eliminates ~35,000 physical CSO visits.	5 items
BPO & Field Operations	BPO request field modification irrespective of status, delivery challan non-mandatory fields, SAP customer code display for CSO/ASE/ASM, restriction on store detail modification when SAP code exists.	4 items

| Data Correction Scripts

Beyond the Development sprint, the team runs a weekly manual data correction cycle, keeping master data clean, accurate, and aligned with field operations. This is an ongoing discipline, not a one-time fix.

9 Scripts completed - 20th April 2026

- Back verification (4 scripts).
- Retailer Deletions.
- FOS Name Change.
- MAT Code Corrections.
- Empl. ID Change.
- Signature Bank Addition.
- Retailer Name Change.
- Retailer Type Change.
- ASM Approval Panel Access.

Note: We are building a No-Code utility for this kind of Manual Script run jobs in the next 2-3 weeks.

| Escalations

While we are having good and positive progress, we also encountered the following escalation.

Pre-Sales Deployment - Delayed from 10th April, going live next week.

- Pre-sales was originally going live on 10th April, but couldn't go live due to the following dependencies:
- Shared Cluster Constraints: The deployment environment is not exclusively available for the RCPL Team.
- Old Team Knowledge Transfer: limited capacity to hand over context during the transition period.
- Current Team Knowledge Gap: the new team required time to ramp up on the existing system architecture and flows

Resolution: These dependencies have been addressed. The demo has been completed today, and the pre-sales deployment is confirmed for next week

| Upcoming Features (28th Apr 2026)

15 items confirmed for the current deployment cycle across Asset Management, CTS, Primary DMS, Pre-Sales, and SFA

15	4	5	3
Items in the current deployment cycle	Tickets	Modules Covered	New SFA Capabilities

Area	What Is Deploying	Count
Asset Management (CTS)	Cash discount by distributor, retailer order listing, Aadhaar Card renamed to Masked Aadhaar Card. State field in Address — dropdown (mandatory) for CSO, ASE/ASM and BPO. Request cannot be created if the state is missing.	4 items
Primary DMS	Bulk Order Modification, Credit Deficit handling, Enable HPC segment for primary ordering.	3 items
Pre-Sales	UI & Validation enhancement, retailer order listing, invoice format phase 2 changes, cart enhancements, load creation enhancement.	5 items
SFA	Target Setting & outlet tiers, Target View for CSO, CSO Performance Dashboard.	3 items

|Release Notes

Summary of features and fixes shipped across three production releases. Sanity tested and confirmed working after each deployment.

Release 1 · First Production Deployment	
CTU Asset Verification — Samruddhi App	
What Was Released Asset verification feature for CCB business in the Samruddhi app. CSOs and Sr. CSOs can now verify Counter Top Units (CTUs) by scanning QR code or entering serial number manually.	Business Impact · CTU tracking across retailers — pan-India visibility · Retailer-level asset deployment accountability · Exact CSO-recorded asset location captured

Release 2 · Second Production Deployment	
Platform Fixes — BPO Flows, Asset Dashboard & Data Quality	
Bug Fix	Delivery Personnel limited to 10 asset requests — now shows all
Bug Fix	Bulk upload was allowing blank SAP Code for BPO users — blocked
Bug Fix	Pagination count not visible on UI — fixed
Bug Fix	Agreements rejected status incorrectly showing for BPO delivery user — fixed
Bug Fix	Asset dashboard record count missing for BPO delivery, CCO, document verifier — fixed
Enhancement	Non-compliant standardised reason list added to dropdown during rejection
Enhancement	Enhancement Asset type CTU/vending machine addition
Bug Fix	Bug Fix Skip BPO customer approval not happening when SAP code already exists — fixed

Release 3 · Latest Production Deployment	
CTS — Asset Management, BPO Flows & Field Operations	
Incident	Incorrect Return Request Flow for Permanent Asset After Successful Delivery — resolved
Incident	Restrict Operational Activities on Dummy Retailers — enforced
Incident	SP and CDE not able to download Asset Sheet for Status ALL — fixed
Incident	Error on Asset Reassignment After Suspension — GRN details not found — resolved
New Feature	BPO customer: modification of request fields & uploads irrespective of request status
New Feature	BPO delivery user: delivery challan fields 3/4/5 made non-mandatory
New Feature	Backend Verification — legacy asset clearance without physical CSO visits
New Feature	SAP Customer Code displayed in app for CSO and ASE/ASM roles
New Feature	CSO restricted from modifying Store Name, Owner, Address when SAP code exists — Mobile Number only

Screenshots

1st Deployment:

Hi Team

We are excited to introduce the **Asset verification feature** in the Samruddhi app for the CCB business, enabling tracking of **Counter Top Units (CTUs)** deployed across the market. This enhancement provides improved visibility and control over asset deployment, helping the business monitor asset distribution across retailers on a pan-India level.

New Capability for CSOs

CSOs and Sr. CSOs can now **verify asset serial numbers** directly within the Samruddhi app:

- Scan the **QR code** on the asset **or**
- Enter the **serial number manually**

Key Highlights & Business Impact

- **CTU Asset & Productivity Tracking**
 - Ability to track the number of Counter Top Units deployed across different retailers.
 - Monitoring impact on sales order value defining asset productivity.
 - Centralized visibility into asset distribution across regions.
- **Retailer-Level Visibility**
 - Identify exactly **which retailer** each asset is deployed to.
 - Strengthens accountability and improves asset utilization tracking.
- **Location Visibility via CSO**
 - Capture and view the **exact location of assets** as recorded by CSOs.
 - Enhances on-ground visibility and traceability.

Thanks for your patience & continued support.

@Utkarsh7 Gupta (Consultant) Will assist the team for further implementation & CSO market training.

Regards

Aanchal Saxena

RCPL Digital

2nd Deployment:

The below features have been deployed to production today. We have completed sanity testing, and all features are working as expected.

Kindly perform sanity checks from your end. If you find anything not working as expected, please let us know—we will address it on priority.

Title
RCPLIPROD Delivery Personnel, only ten asset requests are displayed
PROD RCPL DMS Asset Management New Asset Request Bulk Upload allows blank SAP Code when BPO user uploads file
RCPLIPROD Pagination Count Not Visible on UI
Non-compliant standardized reason list to be added in dropdown during non-compliance rejection
RCPL PROD Skip BPO customer approval is not happening if SAP code already exists
Asset type (CTU/vending machine) addition.
Showing Agreements rejected status for BPO delivery user
Asset dashboard not showing record count in BPO delivery profile, BPO CCO, BPO document verifier

3rd Deployment

Following requirements/incidents have been deployed in production & resolved.

Track	Requirement types	Description
CTS	Incident	RCPLIPROD Incorrect Return Request Flow for Permanent Asset After Successful Delivery
CTS	Incident	RCPLIPROD Asset Restrict Operational Activities on Dummy Retailers
CTS	New Requirement	BPO customer : Modification of request fields & uploads irrespective of status of request
CTS	New Requirement	Make BPO delivery user delivery challan 3/4/5 fields non mandatory
CTS	Operational	Backend Verification
CTS	New Requirement	If the SAP customer code is already created or the asset already exists, do not allow the CSO to modify the Store Name, Owner Name, or Address. Only the Mobile Number should be allowed to be updated.
CTS	New Requirement	Display the SAP Customer Code in the app for CSO and ASE/ASM roles
CTS	Incident	RCPL PROD Asset Management SP and CDE Not able to Download Asset Sheet for Status - ALL
CTS	Operational	RCPL PROD Asset Management Error on Asset Reassignment After Suspension – "GRN details not found for cost update"

Regards

| ANNEXURE

Full Ticket Log

Complete listing of all tickets deployed between March & April and items deploying in the next week.

A. Deployed March - April — 44 Items				
All items below have been deployed to production.				
1	Asset Transfer & Un-allocation flow	Asset Management	Enhancement	Deployed
2	Status change: Pending for Delivery → Suspended by L1 support profile	Asset Management	Enhancement	Deployed
3	Rejection reason visible to CSO, ASE, ASM, CDE Admin on mobile screens	Asset Management	Enhancement	Deployed
4	Non-compliant reason included in downloadable Excel file for BPO customers	Asset Management	Enhancement	Deployed
5	Non-compliant standardised reason list added to dropdown during rejection	Asset Management	Enhancement	Deployed
6	Asset type CTU addition	Asset Management	Enhancement	Deployed
7	Asset dashboard record count not showing — BPO delivery, CCO, document verifier	Asset Management	Bug Fix	Deployed
8	FOS not able to see raised asset requests	Asset Management	Bug Fix	Deployed
9	User unable to change status Pending for Delivery → Suspended via No-Code	Asset Management	Bug Fix	Deployed
10	Incorrect error message when existing retailer number provided during asset request	Asset Management	Bug Fix	Deployed
11	Asset deallocation not updating icon and count on UI	Asset Management	Bug Fix	Deployed
12	Agreements Rejected — Excel download not showing records; now includes remarks	Reporting	Bug Fix	Deployed
13	Installation Complete — Excel not downloading all records; summary count fixed	Reporting	Bug Fix	Deployed
14	Uploaded Agreements — Excel and summary page not showing records; now fixed	Reporting	Bug Fix	Deployed
15	Pending for Delivery — 10+ requests not appearing in driver login app; fixed	Reporting	Bug Fix	Deployed
16	Agreements rejected status incorrectly showing for BPO delivery user	Reporting	Bug Fix	Deployed
17	Pagination count not visible on UI	Reporting	Bug Fix	Deployed

18	PROD BUG — Hard-coded OTP works for every user in Asset Management Dashboard	Security	Critical Fix	Deployed
19	Duplicate asset validation requests with incorrect SAP mapping	Data Integrity	Bug Fix	Deployed
20	Bulk upload allows blank SAP code when BPO user uploads file	Data Integrity	Bug Fix	Deployed
21	Data deletion tracker	Data Integrity	Enhancement	Deployed
22	Retailer owner mobile number modification by CSO	Configuration	Enhancement	Deployed
23	Excel template: Merchant ID field made required	Configuration	Enhancement	Deployed
24	Asset price visible for BPO CCO Creator	Configuration	Enhancement	Deployed
25	GRN template update	Configuration	Enhancement	Deployed
26	Invoice format changes	Configuration	Enhancement	Deployed
27	Settlement UX improvement	Configuration	Enhancement	Deployed
28	Email ID updates	Configuration	Enhancement	Deployed
29	SAP code updates	Configuration	Enhancement	Deployed
30	Matcode update & asset matcode corrections	Configuration	Enhancement	Deployed
31	RCPL data corrections — April Week 2	Configuration	Data Fix	Deployed
32	Return request flow fix for permanent asset after successful delivery	CTS	Bug Fix	Deployed
33	Restrict operational activities on dummy retailers	CTS	Enhancement	Deployed
34	Asset reassignment after suspension — GRN details not found; resolved	CTS	Bug Fix	Deployed
35	SP and CDE not able to download asset sheet for Status ALL; fixed	CTS	Bug Fix	Deployed
36	Backend verification for legacy assets — eliminates ~35,000 physical CSO visits	CTS	Enhancement	Deployed
37	BPO customer: modification of request fields & uploads irrespective of status	BPO Flows	Enhancement	Deployed
38	BPO delivery user: delivery challan fields 3/4/5 made non-mandatory	BPO Flows	Enhancement	Deployed
39	SAP customer code displayed in app for CSO and ASE/ASM roles	UI / Platform	Enhancement	Deployed
40	Restrict CSO from modifying Store Name, Owner, Address when SAP code exists	Asset Management	Enhancement	Deployed
41	Rename Aadhaar Card to Masked Aadhaar Card in dropdown	Configuration	Enhancement	Deployed
42	RCPL data corrections — April Week 2 (scripts)	Data Corrections	Data Fix	Deployed

43	RCPL data corrections — April Week 3 (scripts)	Data Corrections	Data Fix	Deployed
----	--	------------------	----------	----------

B. Deploying Next Week — 15 Items

Items confirmed for the current deployment cycle across 5 modules.

1	Cash discount by distributor	Asset Management	Enhancement	In Progress
2	Retailer order listing	Asset Management	Enhancement	In Progress
3	OTP removal from installation flow	CTS	Enhancement	In Progress
4	Rename Aadhaar Card to Masked Aadhaar Card	CTS / Configuration	Enhancement	In Progress
5	Bulk Order Modification	Primary DMS	Enhancement	In Progress
6	Credit Deficit handling	Primary DMS	Enhancement	In Progress
7	Enable HPC segment for primary ordering	Primary DMS	Enhancement	In Progress
8	UI & Validation enhancement	Pre-Sales	Enhancement	In Progress
9	Retailer order listing	Pre-Sales	Enhancement	In Progress
10	Invoice format phase 2 changes	Pre-Sales	Enhancement	In Progress
11	Cart Enhancements	Pre-Sales	Enhancement	In Progress
12	Load Creation Enhancement	Pre-Sales	Enhancement	In Progress
13	Target Setting & Outlet Tiers	SFA	Enhancement	In Progress
14	Target View for CSO	SFA	Enhancement	In Progress
15	CSO Performance Dashboard	SFA	Enhancement	In Progress

| Phase 2 Roadmap

Four items require visibility. Three need a decision to unblock delivery.

Item	Context	Action Needed
Van Sales & Multi-Role UAM	Both queued — complete Beverage DMS coverage for remaining 20% of distributors (~₹1,000 Cr order volume). Timeline not yet confirmed.	Timeline sign-off from business team
Non-Beverage SFA (POD 3)	Multi-Segment Distributor Mapping and Beat Management not yet initiated. Will resolve 60–70% of current L1 support tickets once live.	Initiation approval & resource allocation
Anchor Order Fulfilment (POD 4)	Covers 20–30% of all distributors across segments. Scope and delivery timeline not defined — significant coverage gap.	Scope definition & prioritisation
UAT Bandwidth	Pre-Sales DMS, Auto DO, and Non-Beverage DMS are all in UAT simultaneously. Business sign-off bandwidth is becoming a bottleneck.	Ensure testing resources are available
