

SOP for Saarthi (Assisted Ordering Platform)

Saarthi is a mobile application designed for sales team who act as the key interface between the platform and merchants. The app enables sales team to onboard new merchants, manage their assigned merchant list, place orders, and track visits to merchants and manage their team.

As part of this release, this platform would enable the sales team to place an assisted ordering for primary orders

Step1: Onboarding of the distributors

- All the RCPL distributors to be onboarded on to the samruddhi platform through the admin panel
- All the users with the user onboarding access on admin panel would be able to onboard the distributors
- The user will have to download the sample template under type “Onboarding” and sub type “Distributor Onboarding”
- The user has to fill in the details and upload the filled in template under the type “Onboarding” and sub type “Distributor Onboarding”
- Admin panel url: <https://portal.reliancedms.com/>

Step2: Onboarding sales team for Saarthi platform access
